

# Talk: Oaksprout the Tan, CPO, presents the first Autonomous NFT Collector DAO, at NFTBERLIN 2022

The main image is a screenshot of a web browser displaying the 'el-collectoon' application. The browser's address bar shows a URL starting with 'el-collectoon-frontend-github-berlin-autonolas'. The application has a dark theme and a red header with the text '!!! DEPOSIT FUNDS AT YOUR OWN RISK. UNAUDITED PRODUCT !!!'. It features three main sections: 'Service' (with 'Collecting' status), 'Fund' (with a '0 ETH' balance and an 'ADD FUNDS' button), and 'Vault' (showing '10k VLT1', '15 ETH', and '0 VLT1'). A 'Gallery' section below the vault shows '0 pieces collected'. A white play button icon is overlaid on the 'Vault' section. In the top right corner, a 'Metatrack Notification' window is open, displaying a '0.01' balance and a 'Metatrack' logo. To the right of the main image is a photograph of a person standing at a podium, presenting to an audience in a room with large windows and indoor plants. The person is wearing a dark shirt and a cap. The audience is seated and facing the presenter. The room has a modern, industrial feel with exposed brick walls and large windows.
