Podcast: David M on protocol deep dives w/ thefett

Thefett hosted this discussion with David M, CEO of Valory, the co-creators of Olas.

> Olas is a protocol at the intersection of web3 and ai. They use autonomous agents to automate tasks and actions done on-chain. At first, I was skeptical because it sounds like a lot of hype, but it was a great discussion talking what can/can't be automated and where the space is going with regard to autonomous actors on-chain. - thefett
