Gnosis and Safe co-founders recognize Olas AI Agents' traction

Co-founder of Gnosis, Martin Köppelmann, and co-founder of Safe, Lukas Schor, made bold predictions about AI Agents in crypto.

Before the end of the year I am convinced the majority of all transactions on Gnosis will be initiated by AI agents! Get your own started: hackathon.olas.network

Olas (aka Autonolas) ✅ @autonolas

So far this month, more than half of all @safe transactions on @gnosischain were generated by autonomous services.

The machine economy is real.

AI agents won't be using EOAs, they will require the programability and safeguards enabled by smart accounts.

Already now, more than half of all @Safe transactions on @gnosischain are made by AI agents. 🤖

Olas (aka Autonolas) ✔ @autonolas

So far this month, more than half of all @safe transactions on @gnosischain were generated by autonomous services.

The machine economy is real.
